

#### Technical Data

Electric supply: 230 V/50 Hz  
Electrical power: 850 W      Width: 350 mm  
Weight: approx. 8,5 kg      Depth: 300 mm

## DUNAFORM PLUS

### Pressure forming device

■ Dunaform Plus is a very user-friendly pressure-forming device due its clear and simple user interface. Preheating is unnecessary due its shortwaved infrared rays and the preinstalled foil settings lead to an efficient workflow. In addition to that you can also save your own foil settings on the device.

Our pressure moulding device DUNAFORM PLUS is a new generation device. Whether used in lab or clinic – it's a sophisticated unit.

- Menu-driven and user-friendly handling
- Large and clearly laid out display
- Permanently programmed sheet parameters plus 10 freely programmable memory spaces
- Time information is given visually and acoustically.
- No pre-heating necessary, the short-wave infrared radiator will set to the desired temperature immediately.
- Heating of the thermoforming foil takes place on the side facing the model.
- Foil reception for two diameters: **120 mm + 125 mm**.  
Thereby almost all commercially available foils can be applied (please find more detailed information on p. 58-60).

The device is delivered including a foil trial set and 2 kg of granules.
